

Subject Index to Volume 32

A

- Acetylcholine** neural reflexes mediating colonic secretion and, G346
- Acetylcholine receptors** muscarinic, in experimental aganglionosis, G940
- Actin** and paracellular permeability, G467
- Activator protein 1** function, effects of somatostatin on, G160
- Adenosine 3',5'-cyclic monophosphate** regulation of gastrin gene expression, G458 secretagogue-induced production, in pancreatic acini, G676
- Adenosine triphosphatase** Ca^{+} , *see Calcium ATPase* $\text{H}^{+}\text{-K}^{+}$, *see Hydrogen-potassium ATPase* $\text{Na}^{+}\text{-K}^{+}$, *See Sodium-potassium ATPase*
- Adenosine triphosphate** and transmitter interactions in internal anal sphincter, G232
- Aganglionosis** experimental, muscarinic acetylcholine receptors in, G940
- Alkaline phosphatase** corticosteroid-induced, serum, solubilization by phospholipase activity, G278
- Amylase** pancreatic, secretion of, G435, G647
- Anal sphincter** external, voluntary and involuntary contractions, speed and pressure characteristics of, G225 internal, transmitter interactions in, G232
- Anti-inflammatory drugs** effects on reactivation of hapten-induced colitis, G119
- Arachidonic acid** calcium mobilization in intestinal longitudinal smooth muscle and, G93 pancreatic secretion and, G435
- Arginine** and induced nitric oxide synthesis in isolated perfused liver, G861 synthesis, intestinal resection and, G313
- Autosomal dominant polycystic kidney disease** liver cyst-derived epithelial cell lines from, characteristics of, G335

B

- Bacteria, normal intestinal, see Intestine, bacterial flora**
- Bacterial overgrowth** and systemic cytokine response to hemorrhagic shock, G827
- Baroreflex, cardiac** chronic portal vein stenosis and, G892
- Baroreflex, hepatorenal** in cirrhosis, G29

Barrier function

- of gastric mucus gel, G994
- Bicarbonate** diffusion through mucus, G453
- Biile** ductal secretion, somatostatin and, G110
- Bile acids** effects on gene expression in rat liver, G961
- Bile salts** effects on gallbladder emptying, G988 gastric mucosal cell injury caused by, cellular hypercalcemia in, G287 hepatic transport, from sinusoidal blood into bile, G801
- Biliary tract disease** in women, G476
- Bombesin** rectosigmoid smooth muscle contraction induced by, mechanisms of, G683
- Brain stem** corticotropin-releasing factor in, and gastric emptying of glucose, G1000
- Breathing** effects on esophageal function, G577
- C**
- Calcium ATPase** hepatic activity, in chronic renal failure, G103 plasma membrane, mechanisms and physiological roles of, G173
- Calcium channels** in intestinal smooth muscle, G378 L-type and gastric rhythmicity in toad and frog, G386 in intestinal smooth muscle, G378 T-type, in intestinal smooth muscle, G378
- Calcium currents, *see Calcium channels***
- Calcium ions** absorption, PMCA1 gene regulation and, G126 cytosolic levels, in hepatocytes, in chronic renal failure, G103 and gastric rhythmicity in toad and frog, G386 influx, in gastric parietal cells, regulation of, G770 and integration of signaling pathways in pancreatic acinar cells, G352 intracellular in bile salt-induced cellular injury, G287 in gastric parietal cells, regulation of, G770 mobilization in intestinal longitudinal smooth muscle, arachidonic acid in, G93 oscillations in pancreatic acinar cells, effects of halothane and octanol on, G779 release, calcium-induced, G173 in intestinal longitudinal smooth muscle, G93

Calcium pump

- PMCA1, cellular and regional expression of transcripts of, G126

Calcium signaling

temporal and spatial heterogeneity of, G173

Calcium waves

- in intact rat liver, G167 mechanisms and physiological roles, G173

Canaliculus, bile

- microscope laser light-scattering of vesicles within, G73

Capsaicin

- secretomotor responses evoked by, G203

Chief cells

- gastric, actions of Rab3 peptides on, G400

Chloride/bicarbonate anion exchanger

- in liver cyst-derived epithelial cells, from autosomal dominant polycystic kidney disease, G335

Chloride channels

slow synaptic excitation in myenteric AH neurons and, G710

Chloride ions

- secretion coupling to somatostatin receptors, in HT-29cl.19A colonocytes, G729 tyrosine kinases and, G874

Cholangiocytotes

- secretin-induced ductal hypercholereresis and exocytosis by, somatostatin and, G110

Cholecystokinin

- in modulation of rectocolonic motor reflex, G240

- as pancreatic secretagogue and acinar cell mitogen, G352

- in regulation of gastric acid secretion in neonatal rats, G721

- secretion, regulation by intraluminal releasing factors, G319

- signaling defect in gallbladder, gallstones and, G659 sphincter of Oddi response to, sex differences in prairie dog, G476

Cholecystokinin receptors

- cloning, G628 coupled to phospholipase A₂ pathways, pancreatic amylase secretion and, G435

- gastrin and, G628

- gene expression, G628

- in mucosal secretory response to pentagastrin, G699 purification of, G628

- structure-function analysis of, G628

Cholelithiasis

- pathophysiology of, G476

Cholera toxin

- intravesicular processing of, G548 signal transduction by, G548

Cholescintigraphy

- of gallbladder emptying rate, studies in prairie dogs, G476

Cholesterol

- metabolism, G60

- Cholinergic nerves**
in internal anal sphincter, G232
nitric oxide and, G232, G246
- Cholinergic receptors**
in regulation of gastric acid secretion in neonatal rats, G721
- Chylomicrons**
remnants, clearance, G144
- Cirrhosis, hepatic**
hepatorenal baroreceptor in, G29
- Colitis**
enhanced absorption during, G210
hapten-induced, reactivation, G119
- Colon**
adaptation to bowel resection, insulin-like growth factor-I in, G974
canine, feedback inhibition from, G945
denervation hypersensitivity, etiology of, studies using experimental aganglionosis, G940
equine, motility in, G262
hastral septations, facilitation of intra-luminal mixing and flow, G706
luminal flow in, G706
motility, G262
neural reflexes mediating secretion in, G346
rectocolonic motor reflex modulation and, G240
smooth muscle electrical activity in, G408
sodium absorption in, enzyme- and steroid receptor-controlled, G42
- Confocal microscopy**
of hepatocellular uptake of long-chain fatty acids, G842
- Corticosteroid-induced alkaline phosphatase**
serum, solubilization by phospholipase activity, G278
- Corticotropin-releasing factor**
in caudal brain stem, and gastric emptying, G1000
- Crohn's disease**
ileal inflammation in, G913
- Cystic fibrosis transmembrane conductance regulator**
genistein- and tyrphostin 47-stimulated chloride secretion and, G874
- Cytokine-induced neutrophil chemoattractant**
ethanol-induced production, by rat liver cells, G518
- Cytokines**
effects on pelvic ganglion neurons, G981
lipid and lipoprotein metabolism and, G953
response to hemorrhagic shock, role of gut flora in, G827
- D**
- Deferoxamine**
effects on free radical formation and reoxygenation injury in hepatocytes, G132
- Deglutition, see Swallowing**
- Deoxycholic acid**
effects on hepatic gene expression in rat, G961
- Dexamethasone**
prodrug, enhanced sodium chloride absorption during colitis and, G210
- Duodenum**
function, nitric oxide and, G246
- E**
- Electrophysiology**
in irritable bowel syndrome, G821
- Endothelin**
actions in liver, vessel- and target cell-specific, G269
effects on gastric blood flow, G524
- Endothelium**
mucin associated with, G613
- Endotoxemia**
hepatocanalicular organic anion transport in, G427
- Enteric nervous system**
colonic secretion and, G346
polarized circuits, in stomach, G186
slow synaptic excitation in myenteric AH neurons in, G710
somatostatin and, G12
in substance P-induced intestinal ion secretion, G85
- Enterocytes**
proliferation, glutamine-stimulated, G591
- Epidermal growth factor**
effects on cAMP production and amylase secretion in pancreatic acini, G676
gastrointestinal absorption of, G867
oral uptake and dissemination of, G867
- Epithelial cells**
biliary, immortalized intrahepatic, G335
intestinal, nerve growth factor synthesis by, G445
liver cyst-derived, from autosomal dominant polycystic kidney disease, characteristics of, G335
- Epithelium**
gastric, protection by mucobcarbonate layer, G994
intestinal
function, somatostatin and, G729
glutamine-stimulated proliferation, G591
low-density lipoprotein receptors, G60
ontogeny of spatial differentiation in, G500
mucin associated with, G613
- Erythromycin**
gastrokinetic effects of, G418
- Esophagogastric junction**
pressure, effects of breathing on, G577
- Esophagus**
descending peristaltic reflex, G219
intramural neural pathways, G219
motor function, G606
effects of breathing on, G577
- Ethanol**
cytokine-induced neutrophil chemoattractant production induced by, in liver, G518
jejunal motility and, G363
- Extracellular matrix**
incorporation of fibronectin into, G902
- F**
- Fatty acids**
long-chain, hepatocellular uptake of, confocal analysis of, G842
- Fibronectin**
extracellular matrix incorporation of, G902
- Flora, intestinal, see Intestine, bacterial flora**
- Free radicals, see Reactive oxygen species**
- G**
- Gallbladder**
cholecystokinin signaling defect in, reversal by G protein activation, G659
emptying, bile salt-dependent inhibition of, G988
- Gallstones**
pathophysiology of, cholecystokinin signaling defect in, G659
- Gastric, see Stomach**
- Gastric acid secretion, see Stomach, acid secretion**
- Gastrin**
gastrin-52, effects on gastric acid secretion in humans, G600
gene expression, regulation by cAMP, G458
metabolism, G600
- Gastrin receptors**
gene expression, G628
in mucosal secretory response to pentagastrin, G699
structure-function analysis of, G628
- Gastrointestinal motility, see also Peristalsis**
esophageal
effects of breathing on, G577
nitric oxide and neuromuscular function in, G606
gallbladder, bile salt-dependent inhibition of, G988
gastroduodenal, effects of 17-norleucine-vasoactive intestinal polypeptide on, G584
in ileitis, G913
peptide YY and, in dogs, G945
somatostatin and, in perfused intestinal segments, G12
- Gene expression**
intestine-specific, mechanisms of, G925
in rat liver, bile acids and, G961
- Genes, see also Immediate early genes**
gastrin, regulation by cAMP, G458
mucin, G613
- Giant migrating contractions**
stimulation, in intestinal inflammation, G913
- Glucagon-like peptide**
GLP-1
in ileal brake, in dogs, G945
in intra-islet regulation of hormone secretion, G852
- Glucocorticoids**
effects on trehalase gene expression during postnatal development, G833
- Glucose**
gastric emptying of, effect of short-term fasting on, G512
jejunal motility and, G363
- Glucose tolerance test**
oral, effects of short-term fasting on, G512
- Glutathione**
plasma, sources, in rat, G396
release, by extrahepatic tissues, in rat, G396
- G proteins**
activation, reversal of cholecystokinin signaling defect in gallbladder, G659

cAMP production and amylase secretion in pancreatic acini and, G676
Gut flora, *see Intestine, bacterial flora*

H**Halothane**

effects on intracellular calcium ion oscillations in pancreatic acini, G779

Heart rate reflex

in chronic portal vein stenosis, vagal and sympathetic components of, G892

Heat-shock protein

translocation with mitogen-activated protein kinase, in bombesin-induced rectosigmoid smooth muscle contraction, G683

Hemodynamics

after liver transplantation, G153
Hemorrhagic shock
 cytokine response to, role of gut flora in, G827

Hepatic microcirculation

high-resolution *in vivo* microscopy, G692

Hepatocyte growth factor

hepatocyte handling of, during liver regeneration in rats, G745

Hepatocytes

apicalateral cytoskeleton, modulation by nitric oxide, G789
 bile salt transport, G801
 calcium waves in, G167
 cytosolic calcium levels, in chronic renal failure, G103
 free radical formation and reoxygenation injury in, effects of deferoxamine in, G132
 microenvironment for, high-resolution *in vivo* microscopy, G692
 microscope laser light-scattering spectroscopy of canalicular vesicles within, G73
 necrosis, induction, lipopolysaccharide and tumor necrosis factor- α in, G297
 non-transferrin-bound iron uptake by, G570

Histamine

in regulation of gastric acid secretion in neonatal rats, G721

Hydrogen-potassium ATPase

nascent, *in vivo* trafficking of, G883

Hyperbilirubinemia

in sepsis, G427

Hypergastrinemia

caused by long-term acid suppression, G699

I**Ileal brake**

peptide YY in, in dogs, G945

ileitis

experimental, sodium-potassium ATPase in rat small intestine with, G666
 gastrointestinal motor abnormalities in, G913

Ileum

canine, feedback inhibition from, G945
 circular muscle, mechanism of action of somatostatin in, G22
 hypertrophied, preservation of peristaltic reflex in, G49
 motor activity, somatostatin-evoked activation, G12
 injury, nitric oxide overproduction and, G34

submucosal secretomotor neurons, capsaicin-evoked activation of, G203

Ileus

postoperative, and colonic smooth muscle electrical activity, G408

Immediate early genes

expression, somatostatin and, G160

Immunocytes

and gastrointestinal motor abnormalities in ileitis, G913

Inflammation

intestinal

see also Crohn's disease

gastrointestinal motor abnormalities in, G913

Inflammatory bowel disease

see also Colitis

animal model, reactivation of, G119

Inhibitory junction potentials

in ileal circular muscle, somatostatin and, G22

Insulin

intra-islet secretion, glucagon-like peptide-1 stimulation of, G852

Insulin-like growth factor

IGF-I, augmentation of resection-induced colonic adaptation, G974

Interleukins

IL-1

gastric antisecretory and anti-ulcer actions, G763

receptor types, in rat stomach, G763

IL-1 β

in dorsal vagal complex, inhibition of gastric contractility, G196

human recombinant, effects on pelvic ganglion neurons, G981

IL-8, see Cytokine-induced neutrophil chemoattractant

IL-6, in response to hemorrhagic shock, G827

Intestinal motility, *see Gastrointestinal motility***Intestine**

see also Colitis; Colon; Rectum

bacterial flora, and systemic cytokine response to hemorrhagic shock, G827

in chylomicron remnant clearance, G144
 gene expression specific to, mechanisms of, G925

low-density lipoprotein receptors, G60

motility, G12

ontogeny of spatial differentiation in, G500

postnatal development, trehalase gene expression during, G833

Intestine, small

cellular gene expression in, patterns of, G500

with experimental ileitis, sodium-potassium ATPase in, G666

ileum

circular muscle, mechanism of action of somatostatin in, G22

feedback inhibition from, in dogs, G945

hypertrophied, preservation of peristaltic reflex in, G49

motor activity, somatostatin-evoked activation, G12

submucosal secretomotor neurons, capsaicin-evoked activation, G203
 injury, nitric oxide overproduction and, G34

jejunum, motility, effects of ethanol, xylose, and glucose on, G363

ornithine decarboxylase activity and enterocyte proliferation in, effects of

glutamine and asparagine on, G591

putrescine transport and accumulation, in rabbit, G754

resection, arginine status in rat and, G313

substance P-induced ion secretion in, G85

Iron

chelation by deferoxamine, G132

metabolism, G570

non-transferrin-bound, hepatic uptake of, G570

Irritable bowel syndrome

perception of rectal distension in, octreotide and, G821

Ischemia-reperfusion

effects on gastric vascular resistance and motility, G524

Isochronism

principle of, G225

Ito cells

hepatic actions of endothelin and, G269

J**Jejunum**

motility, effects of ethanol, xylose, and glucose on, G363

K**Kidney**

intrahepatic baroreceptor and, G29
 postnatal development, trehalase gene expression during, G833

Kidney failure

chronic, and cytosolic calcium in hepatocytes, G103

Kinins

inhibition, in pancreatic disease, G490

Kupffer cells

hepatic actions of endothelin and, G269

L**Leukocytes**

mucin associated with, G613

Light scattering

from canalicular vesicles, G73

Lipids

metabolism

intestinal, G144

tumor necrosis factor- α and, G953

Lipocytes

desmin-negative subpopulation, G532

vitamin A-poor, G532

Lipopolysaccharide

in induction of hepatocyte necrosis, G297

Lipoproteins

circulating, tumor necrosis factor- α and, G953

Liver

see also Hepatocytes

calcium waves in, G167

desmin-negative subpopulation of lipocytes, G532

endothelin-induced sinusoid constriction, G269

endotoxemic, canalicular organic anion transport in, G427

ethanol-induced production of cytokine-induced neutrophil chemoattractant, G518

Liver (continued)
 fibronectin matrix incorporation into, kinetics of, G902
 glutathione concentration and release, in rat, G396
 isolated perfused, arginine and induced nitric oxide synthesis in, G861
 lipid metabolism in, cytokines and, G953
 non-transferrin-bound iron uptake by, G570
 perfusion, high-resolution *in vivo* microscopy of, G692
 posttranscriptional regulation of mRNA levels in, bile acids and, G961
 regeneration, hepatic handling of hepatocyte growth factor during, G745

Liver transplantation

hemodynamics after, G153

Low-density lipoprotein receptors

intestinal, G60

M

MAP kinase, *see* Mitogen-activated protein kinase

Mast cells

in substance P-induced intestinal ion secretion, G85

Medulla oblongata

thyrotropin-releasing hormone in, stimulation of exocrine pancreas, G328

Methodologies

for confocal analysis of hepatocellular long-chain fatty acid uptake, G842
 for high-resolution *in vivo* microscopy of hepatic microcirculation, G692
 for microscope laser light-scattering spectroscopy of canalicular vesicles, G73
 for protein metabolic labeling, for studies of *in vivo* trafficking of nascent H⁺-K⁺-ATPase, G883

Microscopy

see also Confocal microscopy
 of canalicular vesicles within hepatocytes, laser light-scattering spectroscopic method, G73
 high-resolution *in vivo*, of hepatic microcirculation, G692

Mitogen-activated protein kinase

activation, in bombesin-induced rectosigmoid smooth muscle contraction, G683
 gastrointestinal smooth muscle contraction and, G370

Motilin receptors

in gastric smooth muscle, and gastrokinetic effects of erythromycin, G418

Mucin

gene expression, G613
 structure, G613

Mucus

of duodenal epithelium, bicarbonate diffusion through, G453
 gastric, barrier function of, G994

Muscle, circular

ileal, somatostatin in, mechanism of action of, G22

Muscle, smooth

colonic calcium channels in, G378

electrical activity during and after postoperative ileus, G408
 esophageal, descending peristaltic reflex and, G219

gastric motilin receptors, and gastroduodenal effects of erythromycin, G418 rhythmic activity, in toad and frog, G386

gastrointestinal, contraction, modulation by sphingosylphosphorycholine, G370

intestinal, calcium mobilization by arachidonic acid in, G93

Myenteric plexus

AH neurons, slow synaptic excitation in, signal-transduction pathways causing, G710

N

Nerve growth factor

synthesis by intestinal epithelial cells, G445

Neurons

of guinea pig pelvic plexus ganglia, effects of human recombinant interleukin-1 β on, G981

Nitric oxide

in aftereffects of vasoactive intestinal polypeptide in interdigestive state, G584
 calcium-activated potassium current in esophageal muscle cells and, G606
 duodenal function and, G246
 esophageal descending peristaltic reflex and, G219

inhibitory junction potentials and, G22
in vivo gastric relaxation and, G255

intestinal injury and, G34
 modulation of apicalateral cytoskeleton of hepatocytes, G789

in protein kinase C activation, G789
 somatostatin activation of intestinal motor activity and, G12

transmitter interactions in internal anal sphincter and, G232

Nitric oxide synthase

inducible, sources of arginine for, G861
Nonadrenergic noncholinergic inhibitory nerves

in internal anal sphincter, G232
 nitric oxide and, G232, G246

O

Obesity

gastric emptying in, G512

Ocludin

and paracellular permeability, G467

Octanol

effects on intracellular calcium ion oscillations in pancreatic acini, G779

Octreotide

spinal afferent inhibition by, G821

Opioid receptors

in regulation of gastric acid secretion in neonatal rats, G721

Opioids

in modulation of rectocolonic motor reflex, G240

Organic anion-transporting protein

in hepatocyte bile salt transport, G801

Ornithine decarboxylase

intestinal cell, activity, effects of glutamine and asparagine, G591

P

Pancreas

intra-islet regulation of hormone secretion, by glucagon-like peptide-1, G852

Pancreas, exocrine

stimulation by medullary thyrotropin-releasing hormone, G328

Pancreatic acinar cells

amylase secretion
 calcium-dependent, cytosolic factors required for, G647
 cholecystokinin and phospholipase A₂ pathways in, G435
 epidermal growth factor and, G676
 calcium ion oscillations in, effects of halothane and octanol on, G779
 integration of signaling pathways in, G352

Pancreatitis

acute, kinins in, G490

Paracellular permeability

molecular basis for regulation of, tight junctions and, G467

Parietal cells, *see* Stomach, parietal cells

Pelvic flexure

equine, myoelectric activity of, G262

Pentagastrin

mucosecretory response to, G699

Pepsinogen

secretion, and Rab3 peptide effects on gastric chief cells, G400

Peptide YY

in ileal brake, in dogs, G945

Peristalsis

descending, in esophagus, G219

in hypertrophied guinea pig ileum, G49

Phorone

effects on liver glutathione concentration and release, in rat, G396

Phosphatidylinositol 3-kinase

and integration of signaling pathways in pancreatic acinar cells, G352

Phospholipase

glycosyl phosphatidylinositol PLC, serum corticosteroid-induced alkaline phosphatase and, G278

glycosyl phosphatidylinositol PLD, serum corticosteroid-induced alkaline phosphatase and, G278

PLA₂, pathways coupled to CCK receptors, pancreatic amylase secretion and, G435

PLC, and integration of signaling pathways in pancreatic acinar cells, G352

Plasma membrane calcium ion-pumping ATPase

rabbit intestinal, cellular and regional expression of transcripts of, G126

Portal vein

stenosis, baroreflexes and, G892

Potassium channels

calcium-activated, in esophageal muscle cells, modulation by nitric oxide, G606

slow synaptic excitation in myenteric AH neurons and, G710

Principle of isochronism

disturbance of, G225

Protein kinase

PKC, activation, nitric oxide in, G789

Putrescine

intestinal uptake of, G754

Pyloric resistance

vagal control of, G558

R**Ras proteins**

Rab3 peptides, actions on gastric chief cells, G400

Reactive oxygen species

formation in hepatocytes, effects of deferoxamine on, G132

Rectocolonic motor reflex

modulation, cholecystokinin and opioids in, G240

Rectosigmoid colon

smooth muscle contraction, bombesin-induced, G683

Rectum

distension, perception of, octreotide and, G821

rectocolonic motor reflex modulation and, G240

sodium absorption in, enzyme- and steroid receptor-controlled, G42

Reoxygenation injury

in hepatocytes, effects of deferoxamine on, G132

Ryanodine receptor

function, G173

S**Saliva**

epidermal growth factor in, uptake and distribution of, G867

Secretin

release and action, neuronal regulation of, G305

Secretin-releasing peptide

release and action, neuronal regulation of, G305

Secretomotor responses

capsaicin-evoked, G203

Secretory granules

novel serine-specific kinase in, G481

Serine kinase

in zymogen granules, G481

Serotonin

neural reflexes mediating colonic secretion and, G346

Short bowel syndrome

pathophysiology of, G974

Short-circuit current

in electrogenic sodium absorption in rectum, G42

in substance P-induced intestinal ion secretion, G85

Sodium/calcium exchanger

and gastric rhythmicity in toad and frog, G386

hepatic activity, in chronic renal failure, G103

Sodium chloride

enhanced absorption during colitis, G210

Sodium/hydrogen antiporter (sodium/hydrogen exchanger)

function, G1

gene family, G1

regulation, G1

structure, G1

Sodium ions

absorption, in rectum, enzyme- and steroid receptor-controlled, G42

Sodium-potassium ATPase

and gastric rhythmicity in toad and frog, G386

hepatic activity, in chronic renal failure, G103

in rat small intestine, in experimental ileitis, G666

Sodium-taurocholate cotransport polypeptide

in hepatocyte bile salt transport, G801

Somatostatin

ductal bile secretion and, G110

effects on activator protein 1 function, G160

intra-islet secretion, glucagon-like peptide-1 and, G852

mechanism of action, in canine ileal circular muscle, G22

in perfused intestinal segments, G12

Somatostatin receptors

ligand-binding domains, G813

novel mRNA subtype in stomach, G542

subtypes, G813

and regulation of epithelial function, G729

Sphincter of Oddi

response to cholecystokinin, sex differences in prairie dog, G476

Sphingosylphosphorylcholine

gastrointestinal smooth muscle contraction and, G370

Spleen

fibronectin matrix incorporation into, kinetics of, G902

Starvation

short-term, effect on gastric emptying, G512

Steroids

prodruk, enhanced sodium chloride absorption during colitis and, G210

Stomach

acid secretion

gastrin-52 and, G600

in neonatal rats, tonic inhibitory regulation by endogenous peptides, G721

ascending excitation, G186

blood flow

endothelin and, G524

role in impaired mucosal defense and repair in aged rat, G737

chief cells, actions of Rab3 peptides on, G400

contractility, inhibition by interleukin-1 β in dorsal vagal complex, G196

descending relaxation, G186

emptying

brain stem corticotropin-releasing factor and, G1000

effects of short-term fasting on, G512

vagal control of pyloric resistance and, G558

erythromycin and, myogenic and neurogenic mechanisms of action, G418

mucosa

impaired defense and repair in aged rat, role of gastric blood flow, G737

restitution after injury, role of gastric blood flow, G737

mucosal barrier, G994

mucosal cells, deoxycholate injury of, cellular hypercalcemia in, G287

parietal cells

calcium influx in, G770

in vivo trafficking of nascent H⁺-K⁺-ATPase, G883

polarized myenteric circuits in, G186

rhythmic electrical and mechanical activity, in toad and frog, G386

somatostatin receptor mRNA regulation in, G542

ulcer, early pathophysiology, G287

vagally induced relaxation, nitric oxide and, G255

Substance P

ion secretion induced by, G85

Sucrase-isomaltase

gene expression, regulation of, G925

Superoxide dismutase

effects on ischemia-reperfusion-induced alterations in gastric vascular resistance and motility, G524

Swallowing

normal oropharyngeal, effects of gravity and body position on, G653

T**Thyrotropin-releasing hormone**

cerebral, effects on intestinal water transport, G138

medullary, stimulation of exocrine pancreas, G328

Tight junctions

and molecular basis for regulation of paracellular permeability, G467

Transgenic mice

sucrase-isomaltase gene expression in, G925

Trehalase

gene expression, regulation during postnatal development, G833

Tumor necrosis factor

in response to hemorrhagic shock, G827

TNF- α

in induction of hepatocyte necrosis, G297

inhibition of lipid and lipoprotein transport by Caco-2 cells, G953

Tyrosine kinase

and chloride secretion, G874

and integration of signaling pathways in pancreatic acinar cells, G352

U**Upper esophageal sphincter**

function, in swallowing, G653

V**Vagus nerve**

control of pyloric resistance, G558

dorsal vagal complex

in regulation of exocrine pancreas, G328

in regulation of gastric contractility, G196

gastric relaxation induced by, nitric oxide and, G255

regulation of secretin release and action, G305

thyrotropin-releasing hormone

gastric contractility and, G196

intestinal secretion and, G138

pancreatic secretion and, G328

Vasoactive intestinal (poly)peptide
aftereffects, in interdigestive state,
G584
release, somatostatin and, in perfused
intestinal segments, G12
thyrotropin-releasing hormone-stimulated
intestinal secretion and, G138
and transmitter interactions in internal
anal sphincter, G232

W

Water transport
intestinal, cerebral thyrotropin-releasing
hormone and, G138

X

Xylose
jejunal motility and, G363

Y

YM022
prevention of hypersecretion after long-term acid suppression, G699

Z

ZO-1
and paracellular permeability, G467
ZO-2
and paracellular permeability, G467
